

INTERCONNECTING SOUND ATTENUATING ENCLOSURE

ABSTRACT OF THE DISCLOSURE

5

An interconnecting sound attenuating enclosure (20) that incorporates a detachable structural frame (22) made of thermoplastic pipe (34) with slip-in fittings (36), thus providing joints that are dissembled for transportation and storage. A set of walls, doors and a top consisting of individual panels (48) covered with fabric bags (58) are
10 attached to the outside of the structural frame (22) to form the enclosure (20). The sound produced within the enclosure (20) is attenuated to a sufficient degree to be acceptable by others nearby.
